

CITROËN EUROPASS TT PRESENTS

# NEW CITROËN C4 CACTUS COOL

ULTRA-COMFORT HATCH  
WITH A UNIQUE STYLE

## Unique style with daring details

New Citroën C4 Cactus inspires you at a glance with its new front light signature. Slender, sophisticated LED daytime running lights, a refined headlight design around the fog lights add up to a striking, fresh face.

The iconic chrome chevrons extend around the daytime running lights, whilst side scoops and the widened air intake with bright chrome surround contribute to a new sense of dynamism.

Rear styling asserts its versatile hatchback character, complete with stunning, redesigned 3D effect LED light signature.

## A Citroën innovation for unrivalled comfort

Worldwide exclusive, New C4 Cactus features a world-first suspension design that delivers both extraordinary comfort and agility : Progressive Hydraulic Cushions.

Effortlessly absorbing imperfections and changes in the road surface, the system also keeps body movements perfectly controlled for stable progress and quick responses.

The Progressive Hydraulic Cushion™ is like many Citroën innovations: beautifully simple. Unlike an ordinary suspension system that uses a shock absorber, coil spring and mechanical stop, the Citroën solution adds two hydraulic cushions to smoothly control compression and rebound.

This slows down large or abrupt suspension movements and glides over minor road imperfections, delivering a balance of poise and unmatched ride comfort.

## Advanced Comfort seats for all

Wide, welcoming and inspired by furniture design, the seats in New Citroën C4 Cactus are a revelation.

Using high-density foam at the heart of the seat, with textured foam near the surface, they provide real softness while staying supportive too.

The result is a whole new level of driving comfort, whether you're nipping into town or taking a long journey.

## High level standard equipment

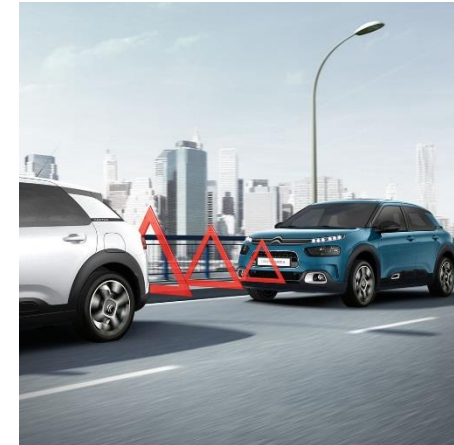

Standard equipment is particularly generous :

- Automatic air conditioned
- Touch-screen GPS system
- Bluetooth device and USB socket
- Rear parking sensors
- Automatic headlamps
- Automatic window wipers
- Front, curtain, and front side airbags
- Electric front windows and side view mirrors
- Electrochrome rear view mirror

# Innovative driving aids

New C4 Cactus Hatch is fitted with numerous last generation driving aids, that will facilitate the handling of the vehicle, and the discovery of your holidays roads :

Active Safety Brake : Designed to reduce the risk of collisions, Active Safety Brake is working for you from 3mph (5 km/h). The system detects fixed or moving obstacles and pedestrians, and sends a clear warning to the driver if a possible collision risk is detected. If you don't respond, it applies the brakes.

Speed Limit Recognition and Recommendation : This useful feature recognises speed limits displayed on road signs and sends the information direct to the instrument panel. It can then be used to set the cruise control /speed limiter.

Lane Departure Warning system : Over 37mph (60km/h), this system senses when a continuous or broken white line is crossed without the indicator being used, sending you a visual and audible alert.

Driver Attention Warning : This ingenious driving aid assesses driver attention level by monitoring changes in vehicle distance from road markings. It's a great safety feature on roads with higher speed limits.

Blind Spot Monitoring System : A serious safety aid on motorways and other high speed routes, this system lets you know if there's a vehicle hidden in the blind spot, using a bright orange warning light in the door mirror.

Coffee Break Alert : If you've been driving for 2 hours at 40mph (65km/h) or more, Coffee Break Alert lets you know that it's time to take a break.

Hill Start Assist : Created to prevent unwanted movement on hills when the brake pedal is released, Hill Start Assist works on gradients over 3%, holding your vehicle still for around 2 seconds. You can now move smoothly from brake to accelerator pedal and drive away.

New C4 Cactus Cool:  
an « Inspired by You » driving experience
